

ST RICHARD REYNOLDS CATHOLIC COLLEGE

VIDETE BONA DOMINI

Science Department

Come and join our Science department. We want to appoint a someone who is ready to grow and develop with our new Catholic College; a keen and enthusiastic teacher who will contribute to both the department and more widely across the College.

You will be joining department of seven keen and enthusiastic teachers with varying levels of experience from those beginning their career through to more than twenty years of experience. We have a fantastic support team comprising of two experienced science technicians.

The Department has a strong team feel, with everyone involved in developing policy and taking responsibility for various aspects of our curriculum as well as the day to day running of the Department. There are many opportunities to take on additional responsibilities either in the department or across the school.

We are currently in the process of developing new Year 13 resources providing a suitable candidate with the opportunity to stamp a mark on developing our A-level schemes of work to support our first A level entries next year.

The department's facilities comprise seven laboratories completed to a high specification providing our staff with the opportunity to deliver fun and engaging lessons.

We are currently following the AQA specification and begin the GCSE with our year nine students. This provides them with a great opportunity to ensure that they are extensively prepared for the more increased content now required. We also feel that this will enable more of our students to take up the separate science course and continue on to A-level.
