

## ST RICHARD REYNOLDS CATHOLIC COLLEGE

### Science Department

Come and join our Science department. We seek to appoint a successful teacher who is ready to grow and develop with our new Catholic College in Twickenham.

You will be joining department made up of 7 keen and enthusiastic teachers at varying levels of experience from those beginning their career through to 15+ years of experience. We have a fantastic support team comprising of 2 experienced science technicians. The Department has a strong team feeling, with staff fully involved in developing policy and taking responsibility for various areas of the Science curriculum and the running of the Department.

There are lots of opportunities to take on additional responsibilities either in the department or across the school supporting our charitable role and pastoral services.

We are presently teaching up to GCSE and will be completing our first year of exams this summer. We are currently in the process of developing our A-level resources and are very excited at the prospect of many of our students and students from other schools joining us to complete their higher education. This will provide a suitable candidate with the opportunity to use their experience to stamp a mark on developing our A-level schemes of work and supporting us with our first intake.

The department facilities comprise of five labs which are going through the process of refurbishment, with three of these already completed to the highest standard. We are also investing and have further plans to build two completely new labs over this coming summer to be ready for the Autumn term. They are all fantastically equipped providing our staff with the opportunity to deliver fun and engaging lessons.

At present we are following the AQA exam board and have started to teach GCSE curriculum to our year nine students. This provides them with a great opportunity to ensure that they are extensively prepared for the more difficult content they will face. This is with the view that it will enable more of our students to be capable to take on the separate science course and continue on to A-level.

We are looking for a keen and enthusiastic candidate who will contribute to both the department and more widely across the school.
