

St Richard Reynolds Catholic Primary School Computing Skills and Knowledge Progression

Computer Science						
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<p>Learning how to operate a camera to take photographs of meaningful creations or moments.</p> <p>Learning how to explore and tinker with hardware to develop familiarity and introduce relevant vocabulary.</p> <p>Recognising and identifying familiar letters and numbers on a keyboard.</p> <p>Developing basic mouse skills such as moving and clicking.</p> <p>Using logical reasoning to understand simple instructions and predict the outcome.</p> <p>Following instructions as part of practical activities and games.</p> <p>Learning to give simple instructions.</p> <p>Experimenting with programming a Bee-bot/ Blue-bot and learning how to give simple commands.</p> <p>Learning to debug instructions, with the help of an adult, when things go wrong.</p>	<p>Learning how to explore and tinker with hardware to find out how it works.</p> <p>Recognising that some devices are input devices and others are output devices.</p> <p>Learning where keys are located on the keyboard.</p> <p>Learning how to operate a camera to take photos and videos.</p> <p>Learning that decomposition means breaking a problem down into smaller parts.</p> <p>Using decomposition to solve unplugged challenges.</p> <p>Using logical reasoning to predict the behaviour of simple programs.</p> <p>Developing the skills associated with sequencing in unplugged activities.</p> <p>Following a basic set of instructions.</p> <p>Assembling instructions into a simple algorithm.</p> <p>Programming a floor robot to follow a planned route.</p> <p>Learning to debug instructions when things go wrong.</p> <p>Using programming language to explain how a floor robot works.</p> <p>Learning to debug an algorithm in an unplugged scenario.</p>	<p>Understanding what a computer is and that it's made up of different components.</p> <p>Recognising that buttons cause effects and that technology follows instructions.</p> <p>Learning how we know that technology is doing what we want it to do via its output.</p> <p>Using greater control when taking photos with cameras, tablets or computers.</p> <p>Developing confidence with the keyboard and the basics of touch typing.</p> <p>Articulating what decomposition is.</p> <p>Decomposing a game to predict the algorithms used to create it.</p> <p>Learning that there are different levels of abstraction.</p> <p>Explaining what an algorithm is.</p> <p>Following an algorithm.</p> <p>Creating a clear and precise algorithm.</p> <p>Learning that programs execute by following precise instructions.</p> <p>Incorporating loops within algorithms.</p> <p>Using logical thinking to explore software, predicting, testing and explaining what it does.</p> <p>Using an algorithm to write a basic computer program.</p> <p>Using loop blocks when programming to repeat an instruction more than once.</p>	<p>Understanding what the different components of a computer do and how they work together.</p> <p>Learning about the purpose of routers.</p> <p>Drawing comparisons across different types of computers.</p> <p>Understanding the role of the key components of a network.</p> <p>Understanding that websites & videos are files that are shared from one computer to another.</p> <p>Learning about the role of packets.</p> <p>Understanding how networks work and their purpose.</p> <p>Identifying the key components within a network, including whether they are wired or wireless.</p> <p>Recognising links between networks and the internet.</p> <p>Learning how data is transferred.</p> <p>Using decomposition to explain the parts of a laptop computer.</p> <p>Using decomposition to explore the code behind an animation.</p> <p>Using repetition in programs.</p> <p>Using logical reasoning to explain how simple algorithms work.</p> <p>Explaining the purpose of an algorithm.</p> <p>Forming algorithms independently.</p> <p>Using logical thinking to explore more complex software; predicting, testing and explaining what it does.</p> <p>Incorporating loops to make code more efficient.</p> <p>Continuing existing code.</p> <p>Making reasonable suggestions for how to debug their own and others' code.</p>	<p>Using tablets or digital cameras to film a weather forecast.</p> <p>Understanding that weather stations use sensors to gather and record data which predicts the weather.</p> <p>Understanding that computer networks provide multiple services, such as the World Wide Web, and opportunities for communication and collaboration.</p> <p>Using decomposition to solve a problem by finding out what code was used.</p> <p>Using decomposition to understand the purpose of a script of code.</p> <p>Identifying patterns through unplugged activities.</p> <p>Using past experiences to help solve new problems.</p> <p>Using abstraction to identify the important parts when completing both plugged and unplugged activities.</p> <p>Creating algorithms for a specific purpose.</p> <p>Coding a simple game.</p> <p>Using abstraction and pattern recognition to modify code.</p> <p>Incorporating variables to make code more efficient.</p> <p>Remixing existing code.</p>	<p>Learning that external devices can be programmed by a separate computer.</p> <p>Learning the difference between ROM and RAM.</p> <p>Recognising how the size of RAM affects the processing of data.</p> <p>Understanding the fetch, decode, execute cycle.</p> <p>Learning the vocabulary associated with data: data and transmit.</p> <p>Learning how the data for digital images can be compressed.</p> <p>Recognising that computers transfer data in binary and understanding simple binary addition.</p> <p>Relating binary signals (Boolean) to the simple character-based language, ASCII.</p> <p>Learning that messages can be sent by binary code, reading binary up to eight characters and carrying out binary calculations.</p> <p>Understanding how bit patterns represent images as pixels.</p> <p>Decomposing animations into a series of images.</p> <p>Decomposing a program without support.</p> <p>Decomposing a story to be able to plan a program to tell a story.</p> <p>Predicting how software will work based on previous experience.</p> <p>Writing more complex algorithms for a purpose.</p> <p>Programming an animation.</p> <p>Iterating and developing their programming as they work.</p> <p>Confidently using loops in their programming.</p> <p>Using a more systematic approach to debugging code, justifying what is wrong and how it can be corrected.</p> <p>Writing code to create a desired effect.</p> <p>Using a range of programming commands.</p> <p>Using repetition within a program.</p> <p>Amending code within a live scenario.</p>	<p>Learning about the history of computers and how they have evolved over time.</p> <p>Using the understanding of historic computers to design a computer of the future.</p> <p>Understanding and identifying barcodes, QR codes and RFID.</p> <p>Identifying devices and applications that can scan or read barcodes, QR codes and RFID.</p> <p>Understanding how corruption can happen within data during transfer (for example when downloading, installing, copying and updating files).</p> <p>Understanding that computer networks provide multiple services.</p> <p>Decomposing a program into an algorithm.</p> <p>Using past experiences to help solve new problems.</p> <p>Writing increasingly complex algorithms for a purpose.</p> <p>Debugging quickly and effectively to make a program more efficient.</p> <p>Remixing existing code to explore a problem.</p> <p>Using and adapting nested loops.</p> <p>Programming using the language Python.</p> <p>Changing a program to personalise it.</p> <p>Evaluating code to understand its purpose.</p> <p>Predicting code and adapting it to a chosen purpose.</p> <p>Understanding how barcodes, QR codes and RFID work.</p> <p>Gathering and analysing data in real time.</p> <p>Creating formulas and sorting data within spreadsheets.</p> <p>Learning about the Internet of Things and how it has led to 'big data'.</p> <p>Learning how 'big data' can be used to solve a problem or improve efficiency.</p>

St Richard Reynolds Catholic Primary School Computing Skills and Knowledge Progression

Information Technology						
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Using a simple online paint tool to create digital art.	Using a basic range of tools within graphic editing software.	Developing word processing skills, including altering text, copying and pasting and using keyboard shortcuts.	Taking photographs and recording video to tell a story.	Building a web page and creating content for it.	Using logical thinking to explore software more independently, making predictions based on their previous experience.	Using logical thinking to explore software more independently, iterating ideas and testing continuously.
Representing data through sorting and categorising objects in unplugged scenarios	Taking and editing photographs.	Using word processing software to type and reformat text.	Using software to edit and enhance their video adding music, sounds and text on screen with transitions.	Designing and creating a webpage for a given purpose.	Using a software programme (Sonic Pi/Scratch) to create music.	Using search and word processing skills to create a presentation.
Representing data through pictograms.	Developing control of the mouse through dragging, clicking and resizing of images to create different effects.	Using software (and unplugged means) to create story animations.	Learning to log in and out of an email account.	Use online software for documents, presentations, forms and spreadsheets.	Using video editing software to animate.	Planning, recording and editing a radio play.
Exploring branch databases through physical games.	Developing understanding of different software tools.	Creating and labelling images.	Writing an email including a subject, 'to' and 'from'.	Using software to work collaboratively with others.	Identify ways to improve and edit programs, videos, images etc.	Creating and editing sound recordings for a specific purpose.
	Recognising devices that are connected to the internet.	Searching for appropriate images to use in a document.	Sending an email with an attachment.	Understanding why some results come before others when searching.	Independently learning how to use 3D design software package TinkerCAD.	Creating and editing videos, adding multiple elements: music, voiceover, sound, text and transitions.
	Understanding that we are connected to others when using the internet.	Understanding what online information is.	Replying to an email.	Using keywords to effectively search for information on the internet.	Developing searching skills to help find relevant information on the internet.	Using design software TinkerCAD to design a product.
	Searching and downloading images from the internet safely.	Collecting and inputting data into a spreadsheet.	Understanding the vocabulary associated with databases: field, record, data.	Understanding that information found by searching the internet is not all grounded in fact.	Learning how to use search engines effectively to find information, focussing on keyword searches and evaluating search returns.	Creating a website with embedded links and multiple pages.
	Understanding that technology can be used to represent data in different ways: pictograms, tables, pie charts, bar charts, block graphs etc.	Interpreting data from a spreadsheet.	Learning about the pros and cons of digital versus paper databases.	Searching the internet for data.	Understanding how data is collected in remote or dangerous places.	Understanding how search engines work.
	Using data representations to answer questions about data.	Learning how computers are used in the wider world.	Sorting and filtering databases to easily retrieve information.	Designing a device which gathers and records sensor data.	Understanding how data might be used to tell us about a location.	
	Using software to explore and create pictograms and branching databases.		Creating and interpreting charts and graphs to understand data.	Recording data in a spreadsheet independently.	Understanding how data is used to forecast weather.	
	Understanding some of the ways we can use the internet.		Recognising how social media platforms are used to interact.	Sorting data in a spreadsheet to compare using the 'sort by...' option.	Learn about different forms of communication that have developed with the use of technology.	
	Recognising common uses of information technology, including beyond school.		Understanding the purpose of emails.	Understanding that data is used to forecast weather.		
				Understanding that software can be used collaboratively online to work as a team.		

St Richard Reynolds Catholic Primary School Computing Skills and Knowledge Progression

Digital Literacy						
EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<p>Recognising that a range of technology is used in places such as homes and schools.</p> <p>Learning to log in and log out</p>	<p>Logging in and out and saving work on their own account.</p> <p>When using the internet to search for images, learning what to do if they come across something online that worries them or makes them feel uncomfortable.</p> <p>Understanding how to interact safely with others online.</p> <p>Recognising how actions on the internet can affect others.</p> <p>To be able to recognise what a digital footprint is and how to be careful about what we "post".</p>	<p>Identifying whether information is safe or unsafe to be shared online.</p> <p>Learning how to create a strong password.</p> <p>Learning to be respectful of others when sharing online and ask for their permission before sharing content.</p> <p>Learning strategies for checking if something they read online is true.</p> <p>Understanding how to stay safe when talking to people online and what to do if they see or hear something online that makes them feel upset or uncomfortable.</p>	<p>Recognising that different information is shared online including facts, beliefs and opinions.</p> <p>Learning how to identify reliable information when searching online.</p> <p>Learning how to stay safe on social media.</p> <p>Considering the impact technology can have on mood.</p> <p>Learning about cyberbullying.</p> <p>Learning that not all emails are genuine, recognising when an email might be fake and what to do about it.</p>	<p>Learning to make judgements about the accuracy of online searches.</p> <p>Identifying forms of advertising online.</p> <p>Recognising what appropriate behaviour is when collaborating with others online.</p> <p>Reflecting on the positives and negatives of time online.</p> <p>Identifying respectful and disrespectful online behaviour.</p> <p>Recognising that information on the Internet might not be true or correct and that some sources are more trustworthy than others.</p>	<p>Identifying possible dangers online and learning how to stay safe.</p> <p>Evaluating the pros and cons of online communication.</p> <p>Recognising that information on the Internet might not be true or correct and learning ways of checking validity.</p> <p>Learning what to do if they experience bullying online.</p> <p>Learning to use an online community safely.</p>	<p>Learning about the positive and negative impacts of sharing online.</p> <p>Learning strategies to create a positive online reputation.</p> <p>Understanding the importance of secure passwords and how to create them.</p> <p>Learning strategies to capture evidence of online bullying in order to seek help.</p> <p>Using search engines safely and effectively.</p> <p>Recognising that updated software can help to prevent data corruption and hacking</p>
