The Careers Programme

St Richard Reynolds Catholic College (High School)

Date of publication: September 2022

Date of next review: April 2024

Careers Education, information, advice and guidance (CEAIG) at St Richard Reynolds Catholic College aims to encourage students to consider a wide range of options and opportunities and ultimately to go into courses and jobs which suit their needs, skills, ambitions, interests and qualities. Careers education and guidance programmes make a major contribution to preparing young people for the opportunities, responsibilities and experiences of life. A planned and progressive programme of activities supports students in choosing pathways from 11 - 19 years old.

In order to deliver good careers guidance, our Careers department follows all 8 Gatsby Benchmarks and is committed to the pursuit of excellence in all that we do. We work tirelessly to achieve our main aims which are:

- Ensuring that our students have access to high-quality information on careers, different job roles and professions, labour market information, a full range of post 16 and post 18 pathways and training opportunities
- Inspiring students to be ambitious and develop their career curiosity
- Raising their careers awareness by an active engagement in careers interactions
- Preparing students for life post-education and instilling a healthy attitude towards work
- Offering targeted support for vulnerable and disadvantaged young people

	The Gatsby benchmarks of Good Career Guidance
1. A stable careers programme	<p>Every school and college should have an embedded programme of career education and guidance that is known and understood by pupils, parents, teachers, governors and employers.</p>
2. Learning from career and labour market information	<p>Every pupil, and their parents, should have access to good quality information about future study options and labour market opportunities. They will need the support of an informed adviser to make best use of available information.</p>
3. Addressing the needs of each pupil	<p>Pupils have different career guidance needs at different stages. Opportunities for advice and support need to be tailored to the needs of each pupil. A school's careers programme should embed equality and diversity considerations throughout.</p>
4. Linking curriculum learning to careers	<p>All teachers should link curriculum learning with careers. STEM subject teachers should highlight the relevance of STEM subjects for a wide range of future career paths.</p>
5. Encounters with employers and employees	<p>Every pupil should have multiple opportunities to learn from employers about work, employment and the skills that are valued in the workplace. This can be through a range of enrichment activities including visiting speakers, mentoring and enterprise schemes.</p>
6. Experiences of workplaces	<p>Every pupil should have first-hand experiences of the workplace through work visits, work shadowing and/or work experience to help their exploration of career opportunities, and expand their networks.</p>
7. Encounters with further and higher education	<p>All pupils should understand the full range of learning opportunities that are available to them. This includes both academic and vocational routes and learning in schools, colleges, universities and in the workplace.</p>
8. Personal guidance	<p>Every pupil should have opportunities for guidance interviews with a career adviser, who could be internal (a member of school staff) or external,</p>

	<p>provided they are trained to an appropriate level. These should be available whenever significant study or career choices are being made. They should be expected for all pupils but should be timed to meet their individual needs.</p>
